Macro-economic research, yield curve analysis, portfolio construction

FIRM OVERVIEW

SeaCrest Investment Management (SIM) is a SEC registered investment advisor, specializing in the management of portfolios for institutional and private clients. SIM is employee-owned and is certified as a minority-owned Firm with offices in New York, Michigan and South Dakota. The Firm is led by a group of seasoned asset management professionals with over 70 years of combined experience. With their discipline and insight into market trends, they seek to deliver attractive risk-adjusted returns in client portfolios.

INVESTMENT OBJECTIVE

SeaCrest U.S. Government Intermediate Duration Strategy seeks returns that generally correspond to the performance of the U.S. intermediate Government bond markets.

BENCHMARK

The benchmark is the Bloomberg Barclays US Government Intermediate Index.

	3Q2018	Trailing 1 yr	Trailing 3 yr*	Trailing 5 yr*	Since Inception* (12/31/03)
SeaCrest U.S Gov't Int. Dur. Strat (Gross/Net)	0.11%	-0.90%	0.78%	1.17%	4.04%
Bloomberg Barclays US Gov't Int. Index	-0.11%	-1.18%	0.19%	0.93%	2.91%

*Annualized   Note: 100% of the composite is comprised of non-fee paying accounts for all periods

2008	$ 14.32	$ 0.98	15.86%	10.43%	n/a	8.07%	3.21%
2007	$ 7.09	$ 0.85	10.11%	8.47%	n/a	6.56%	2.38%

Note: Internal dispersion is the asset-weighted standard deviation: *100% of the composite is comprised of non-fee paying accounts for all periods.*

SeaCrest Investment Management, LLC is a Registered Investment Advisor with the State of New York and the SEC.

Investing in the SeaCrest U.S. Government Intermediate Duration Strategy is subject to a number of investment risks including credit risk, interest rate risk, and prepayment risk. Credit risk is the risk that the issuers of the bonds owned in the portfolio may default (fail to pay the debt that they owe on the bonds that they have issued). Interest rate risk is the risk that the market value of the bonds owned in the portfolio will fluctuate as interest rates go up and down. For example, when interest rates go up, the market value of bonds owned in the portfolio generally will go down. Nearly all bond investments are subject to this type of risk, but investment portfolios holding bonds with longer maturities are more subject to this risk than funds holding bonds with shorter maturities. Because of this type of risk, you can lose money. Prepayment risk is the risk that the issuers of the bonds owned in the portfolio will prepay them at a time when interest rates have declined. Because interest rates have declined, the portfolio may have to reinvest the proceeds in bonds with lower interest rates, which can reduce the portfolio’s return. Not all bonds, however, can be prepaid.

SeaCrest Investment Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SeaCrest Investment Management, LLC has been independently verified for the periods June 1, 2006 through December 31, 2017. The verification report(s) is/are available upon request. Verification assesses whether (1) the Firm has complied with all the composite construction requirements of the GIPS standards on a Firm-wide basis and (2) the Firm’s policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. The following are available upon request: a list of composite descriptions and policies for valuing portfolios, calculating performance, preparing compliant presentations. The composite was created January 1, 2010 and contains all discretionary, fixed income only accounts that invest solely in USD denominated US Government securities, US Government guaranteed Agencies and FDIC guaranteed CDs plus cash. Occasionally a cash allocation is warranted. The US Dollar is used to express performance. Results are based on fully discretionary accounts under management, including those accounts that may no longer be with the Firm. For comparison purposes the composite is measured against the Bloomberg Barclays US Government Intermediate Index.

The Firm charges a management fee of between 0.20% to 1.25% of assets, as outlined in the Firm’s Form ADV Brochure. A portion of the annualized fee, based on the total market value of each portfolio, is charged to the client each quarter. In certain circumstances, fees may be negotiable depending on the investment strategy selected and the size and nature of the account relationship. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Assuming (a) a quarterly fee assessment, (b) a $1 million investment, (c) a portfolio return of 8% a year, and (d) a 1.00% annual investment advisory fee, the collection of management fees produces a compounding effect on the total value of a client's portfolio of $10,416 in the first year, $59,816 over five years and $143,430 over ten years. Actual investment advisory fees incurred by clients may vary.
