WHY CLEAN ENERGY

Diversification

Opportunity to invest in a broad spectrum of clean energy companies.

Correlation

Low correlation with US fixed income markets.

Opportunities

Access to an investment universe focused on innovation and advancing of alternative sources of clean energy in potentially high growth markets.

FIRM OVERVIEW

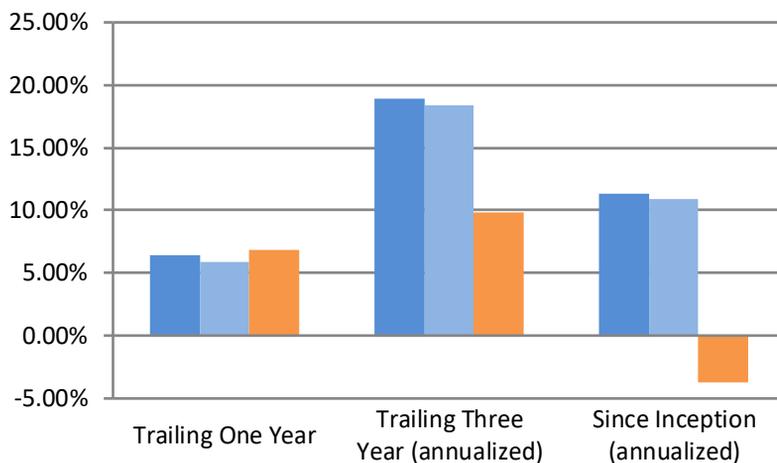

SeaCrest Investment Management (SIM) is a SEC registered investment advisor, specializing in the management of portfolios for institutional and private clients. SIM is employee-owned and is certified as a minority-owned Firm with offices in New York, Michigan and South Dakota. The Firm is led by a group of seasoned asset management professionals with over 70 years of combined experience. With their discipline and insight into market trends, they seek to deliver attractive risk-adjusted returns in client portfolios.

INVESTMENT OBJECTIVE

SeaCrest Global Clean Energy Portfolio tracks the SeaCrest Global Clean Energy Index, a market capitalization-weighted equity index designed to serve as a benchmark for global stocks traded on major US stock exchanges and representing the following clean energy sectors: clean and renewable energy, energy efficiency, infrastructure, materials, power management and water management.

BENCHMARK

The benchmark is the WilderHill Clean Energy Index – CEI. Is a modified equal dollar weighted index comprised of publicly traded companies whose business's stand to benefit substantially from cleaner energy and conservation

Note: Internal dispersion is the asset-weighted standard deviation. # Composite Inception date: 5/31/2014; indicates partial year return from 5/31/2014 to 12/31/2014

* Wrap fee is charged for 100% of the AUM in the composite at 12/31/2018.

**Non-Wrap Net-Of-Fee Return is calculated by reducing the Blended gross return by the highest fee charged for any Non-Wrap-Fee client in the composite.

DISCLOSURES

SeaCrest Investment Management, LLC ("SeaCrest") is a Registered Investment Advisor with the U.S. Securities and Exchange Commission ("SEC"). SeaCrest Investment Management, LLC. This report is provided for informational purposes only to summarize the investment philosophy of the SeaCrest Global Clean Energy Portfolio, a separate account strategy managed by SeaCrest. This report is not to be considered investment advice nor an offer for this strategy. Investment management services are provided by SeaCrest only after enter into an investment management agreement with SeaCrest or and/or an approved financial intermediary. Information is as of a point in time and is subject to change.

SeaCrest Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SeaCrest has been independently verified for the periods June 1, 2006 through December 31, 2018. The verification report(s) is/are available upon request. Verification assesses whether (1) the Firm has complied with all the composite construction requirements of the GIPS standards on a Firm-wide basis and (2) the Firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. The following are available upon request: a list of composite descriptions and policies for valuing portfolios, calculating performance, preparing compliant presentations.

The SeaCrest Global Clean Energy Index (SGCEI) Composite requires assets per account in excess of \$300,000 and contains all discretionary, fee paying accounts that invest in the Global Clean Energy strategy which includes all securities identified by the SmartView™ process. These accounts seek to track the SeaCrest Global Clean Energy Index, a market capitalization-weighted equity index designed to serve as a benchmark for global clean energy stocks traded on major US stock exchanges. This portfolio tracks the following clean energy sectors: clean & renewable energy, energy efficiency, infrastructure, materials, power management and water management. An investor's portfolio is rebalanced annually typically during the month of May (but no later than month-end June) subject to a rebalancing of the model during the month of May.

The Index is rebalanced annually with cash allocation being occasionally warranted. **There are no assets in the Index composite at this time.** The Composite was created May 31, 2014 and consists of portfolios limited to 30 securities (a sub-set of the SGCEI above) plus cash for those accounts within a \$75,000 to \$300,000 range. The US Dollar is used to express performance. Results are based on fully discretionary accounts under management, including those accounts that may no longer be with the Firm. Three year ex-post standard deviation is not included as the composite does not have a 36 monthly return at this time for 2014 through 2016.

The Firm charges a management fee of between 0.20% to 1.15% of assets, as outlined in the Firm's Form ADV Brochure. A portion of the annualized fee, based on the total market value of each portfolio, is charged to the client each quarter. In certain circumstances, fees may be negotiable depending on the investment strategy selected and the size and nature of the account relationship. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Assuming (a) a quarterly fee assessment, (b) a \$1 million investment, (c) a portfolio return of 8% a year, and (d) a 1.00% annual investment advisory fee, the collection of management fees produces a compounding effect on the total value of a client's portfolio of \$10,416 in the first year, \$59,816 over five years and \$143,430 over ten years. Actual investment advisory fees incurred by clients may vary.

Effective March 1, 2019, Howard Schloss became the primary portfolio manager for this strategy. Additional details are available upon request or by reviewing SeaCrest's 2019 ADV. As a result of a system upgrade, effective April 1, 2019, a change in the methodology to calculate composite returns may result in differences in previously reported returns compared to returns reported herein. More information regarding this change is available upon request
