

# SeaCrest International Sovereign Debt

June 30, 2021 FACTSHEET

Performance and Portfolio Characteristics

## INVESTMENT TEAM

### Howard Schloss

Portfolio Manager

40 years investment experience  
MBA, Fordham University

### Sanjay Gupta

Portfolio Manager

24 years financial services experience  
MBA, St. John's University

### Chicky Mahtani

Advisor

28 years investment experience  
BBA, New York University

## WHY INVEST ABROAD

### Diversification

Opportunity to own non-US fixed income securities denominated in U.S. Dollars

### Correlation

Low correlation with global equities

### Risk Adjusted Returns

Stability of developed markets coupled with developing markets tends to generate attractive risk-adjusted results

### Opportunities

Access to a larger investment universe as more than 2/3rds of the world bond markets are outside of the US

## FIRM OVERVIEW

SeaCrest Investment Management (SIM) is a SEC registered investment advisor, specializing in the management of portfolios for institutional and private clients. SIM is employee-owned and is certified as a minority-owned Firm with offices in New York, Michigan and South Dakota. The Firm is led by a group of seasoned asset management professionals with over 70 years of combined experience. With their discipline and insight into market trends, they seek to deliver attractive risk-adjusted returns in client portfolios.

## INVESTMENT OBJECTIVE

SeaCrest International Sovereign Debt strategy seeks to maximize return by investing in the sovereign, quasi-sovereign and supranational debt instruments of developed (ex-US) and developing nations.

## BENCHMARK

The benchmark is FTSE World Government Global Bond Index 3 to 5 Year Maturity ex-US Hedged into US Dollars.

	2Q2021	One Year Trailing	Three Year Trailing*	Five Year Trailing*	Since Inception 12/31/09*
SeaCrest Int'l Sov Debt - Gross	0.22%	2.59%	4.24%	2.99%	3.45%
SeaCrest Int'l Sov Debt - Net	0.10%	2.09%	3.74%	2.49%	2.95%
FTSE WGBI 3-5 yr ex US (hedged)	0.16%	-0.05%	3.46%	2.21%	2.46%

\* Annualized.

Net return is calculated by reducing the gross return by the highest fee charged for any client in the composite.

Please refer to the GIPS report for additional information.

## WHY INVEST WITH SEACREST

### Experience

Portfolio managers with first-hand knowledge of developed and emerging markets

### Risk Discipline

A rigorous risk control process

### Investment Process

In-depth evaluation of the sources of value

The Benchmark is the FTSE World Government Global Bond Index 3 to 5 year maturity ex-US hedged into US dollars.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fee returns of those portfolios that were included in the composite for the entire year.

Net Return is calculated by reducing the gross return by the highest fee charged for any client in the composite.

The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 3-years.

Effective 12/31/2015 the benchmark was changed from 50/50 JP Morgan EMBI+ and JP Morgan GBI ex-US hedged in order to better align the composite with a benchmark which reflects similar characteristics i.e. duration and holdings.

## DISCLOSURES

SeaCrest Investment Management, LLC is a Registered Investment Advisor with the Securities Exchange Commission.

SeaCrest Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SeaCrest Investment Management has been independently verified for the periods June 1, 2006 through December 31, 2020. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The following are available upon request: a list of composite descriptions and the firm's policies for valuing portfolios, calculating performance, preparing GIPS reports.

The composite was created December 31, 2009. The minimum asset level is \$350,000. The composite contains all discretionary, fee paying, fixed-income only accounts that invest primarily in USD denominated developed, developing and emerging market corporate, sovereign and quasi-sovereign debt. The US Dollar is used to express performance. Results are based on fully discretionary accounts under management. Accounts that are no longer with the firm are included through the last full measurement period such accounts were managed in the composite's style. The three-year annualized ex-post standard deviation of the composite and benchmark is not presented because 36 monthly returns are not available.

**The Firm charges a maximum management fee of 0.50% of assets. Actual investment advisory fees incurred by clients may vary. A portion of the annualized fee, based on the total market value of each portfolio, is charged to the client each quarter. In certain circumstances, fees may be negotiable depending on the investment strategy selected and the size and nature of the account relationship. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Assuming (a) a quarterly fee assessment, (b) a \$1 million investment, (c) a portfolio return of 8% a year, and (d) a 1.00% annual investment advisory fee, the collection of management fees produces a compounding effect on the total value of a client's portfolio of \$10,416 in the first year, \$59,816 over five years and \$143,430 over ten years.**

Effective March 1, 2019, Howard Schloss became the primary portfolio manager for this strategy. Additional details are available upon request or by reviewing SeaCrest's 2019 ADV. As a result of a system upgrade, effective April 1, 2019, a change in the methodology to calculate composite returns may result in differences in previously reported returns compared to returns reported herein. More information regarding this change is available upon request.
